SUMMARY

I'm an IT engineering student with a passion for building smart, user-friendly tech solutions. I enjoy solving problems, learning new tools, and pushing creative ideas—especially when working on projects that make a real difference.

EXPERIENCE

Backend Developer Intern

TravelXp   **September 2025 - Present, Mumbai**

· Collaborated with the software development team to design and improve RESTful APIs using **Node.js**, helping enhance performance and reliability.
· Managed and organized data in **MongoDB**, ensuring smooth data flow and efficient database operations.
· Tested and debugged APIs with **Postman** to maintain stability and deliver consistent results across different endpoints.
· Collaborated with the team on **GitHub**, handling version control, code reviews, and project updates to keep the workflow seamless.
· Gained hands-on experience in building backend systems that power real-world applications and learned how different components connect behind the scenes.

PROJECT

Health Monitoring System

January 2025 - May 2025

· **Developed a health monitoring web application** using **Node.js** and **Express.js** for the backend, **HTML5, CSS3, JavaScript, React and Vite** for the frontend, and **MySQL** for data storage.
· Primarily contributed to the **software development** side by designing and implementing the full-stack web application.
· **Built RESTful APIs** for **user authentication (login & registration)**, **data retrieval from the database to the frontend**, and delivering **general health insights**.
· The system allows users to securely register and log in and provides access to their heart rate (across different time intervals) and SpO_2 data, captured using a MAX30102 sensor integrated with an Arduino Uno.

Travel Itinerary Planner

February 2025 - March 2025

· **Developed** a web application using **Java Servlet/JSP** for the backend and **HTML5**, **CSS3** and **Bootstrap** for the frontend, with **MySQL** managing the database.
· **Streamlined** vacation planning by enabling users to explore curated destinations and activities based on user preferences.
· **Implemented** user authentication, allowing users to **register**, **log in**, **save** and **update** favorite places and activities for quick access on future visits.

Nike Website Clone

nike-clone-g9x5.onrender.com/ · October 2024 - December 2024

· Created a Nike website UI clone using **HTML5** and **CSS3** to gain hands-on experience and a deeper, practical understanding of modern frontend design.

SKILLS

TECHNICAL SKILLS :

Languages - Java, C, C++
Frontend Technologies - HTML 5, CSS 3, JavaScript(ES 6+), Bootstrap, jQuery
Backend Technologies- Nodejs, Express.js
Databases/OS - MongoDB, MySQL, Ubuntu, Windows
Frameworks/Tools - Hibernate, Spring Boot, Postman, Git, GitHub, Overleaf, Google Collab
Libraries - React.js
Machine Learning - Supervised Learning, Unsupervised Learning

SOFT SKILLS :

Critical Thinking, Problem-Solving, Effective Communication

CERTIFICATIONS

Java Full Stack Developer
Seed Infotech Ltd. · 2025
· Trained in Core Java, Advance Java Technologies Like JSTL, JSP, HTML 5, CSS 3, JavaScript(ES6+), MongoDB, MySQL,
· Built full-stack web applications with real-time backend integration

EDUCATION

Bachelor of Engineering
Konkan Gyanpeeth College Of Engineering · Karjat, MH · 2026

HSC
Lakshya Prep High School & Junior College · Kalyan, MH · 2022

SSC
Shri Vani Vidya Shala High School · Kalyan, MH · 2020
